Summary:

- Nutritional Quality Prediction:
    - A distinct list of all items in our database: 498 entries; Translated from Portuguese to English using Google Translate.
    - Predict nutrition facts on 400 entries (their batch limit) using MINT.
- Exploratory Analysis:
    - Fixed the previous issue of ticket counting by adding constraints to our query.
    - Explore the total revenue of each restaurant each month - try to find patterns and growth KPIs.
- Expect to do next:
    - Explore payment patterns - how many people are dividing the bill or paying the total? This is only applicable to the restaurant's Cantina Volpi and Ferreiro Café.
    - Find new KPIs that can interest the restaurant - new KPIs that can go on a monthly report.
